**World's ONLY 10 Passenger Motorcycle, The Anaconda,
schedule as a feature at Axis of Steel - A Motorcycle Experience**

Etters, PA - August 19, 2009 - Angel Marketing Group, LLC signs the Anaconda, the World's ONLY 10 Passenger Motorcycle as a feature for the Axis of Steel - A Motorcycle Experience event to be held at the Lancaster County Convention Center on October 30 through November 1, 2009.

"World's ONLY!" passionately expresses Eric Kropiewnicki, manager of AMG. "This is an attraction that expects to bring many to the event; even those not part of the motorcycle community."

The Anaconda 'Limo' seats 10 passengers, in a row, front to back, with a stretch of about 20 feet in length. It was constructed by Stephen McGill with a 1998 Harley-Davidson Electra Glide and custom rear, licensed for road use.

The Anaconda hails from Kansas City but plans to bring a lot of excitement to the Axis of Steel event in Lancaster, PA that weekend.

The Anaconda will be featured and on display for photo opportunities and merchandise sales.
